

# FACTS PDF Documentation Library

## **Welcome to the FACTS 7.7 PDF Documentation Library.**

This library contains user manuals that can be viewed on-screen with Adobe's Acrobat Reader. If you do not already have a copy of Acrobat Reader on your system, install it now. You can print this documentation to your office laser printer or take it to any place that provides photocopying services.

**To access any of the FACTS manuals**, click on one of the bookmarks at the left. This will take you to the manual for the module you specify. From there, you can click on any of the bookmarks to open a chapter or specific topic in the manual. You can also directly open one of the PDF documents by double-clicking the .pdf file from Windows Explorer.

**Navigating the manuals.** When you open a document in Acrobat Reader, bookmarks appear in panel on the left. These are essentially chapter headings and subheads. If you are new to the Library, browsing bookmarks may be the best way to acquaint yourself with the information that is available.

**Navigation Tips:** You can press the **F5** key to hide or display bookmarks. To view information, use the buttons on the toolbar to turn the pages in a document and the buttons to retrace your path within the FACTS Documentation library. You can use the commands under the *View* menu or the (page) icons on the toolbar to resize the page display.

**Additional help:** For additional information on using Adobe Acrobat's search feature on any other Acrobat features, you can access the Acrobat Reader Guide. In Acrobat Reader, select *Help>Reader Guide*.
